

# Octopart Integration

## Direct Access to Online Parts Database

The Octopart Search integration module helps engineers save time during design by eliminating the need to search multiple manufacturer websites for component data and documents when creating new parts.

Integration with Octopart allows Omnify Empower users to directly search the Octopart database of a growing list of more than 30 million parts across thousands of suppliers. Users can check and create vendors, vendor parts, and associated items through a formal Part Request in Omnify Empower, while populating attributes/parameters, datasheets, and compliance documents directly from the available data in Octopart.

**Reduce time spent searching for parts. Gain visibility into cost, availability and compliance data. Automatically populate data from Octopart upon New Part creation in Omnify Empower.**

Search the Octopart database from within Omnify Empower.

Check Omnify Empower to determine if a vendor/supplier or part already exists in the system.

Create vendors, vendor items and associated items and automatically populate data (parameters, documents/datasheets, compliance data) from Octopart using Omnify Empower request processes.

### Key Features/Benefits:

- Quickly search the Octopart online parts database from within Empower
- Link directly to items in Octopart from Empower for additional information (costs, availability, purchase parts directly)
- Easily create vendors, vendor parts, and Omnify Empower items
- Automatically populate attributes/parameters, datasheets and compliance documents based on Octopart content
- More quickly determine which components meet environmental and other compliance guidelines
- Eliminate searching multiple manufacturer websites
- Improve design decision making process

## Omnify Empower

Omnify Software provides a single, secure location to manage the complete product record including: product data, bill of materials, engineering changes, product documentation, project, quality/CAPA, and training records information. The Omnify Empower system enhances visibility into the entire product development process by capturing design, manufacturing, quality, service, and customer information and associating it to the product record. Omnify Empower is a business-ready solution that is easy to use, quick to implement and can be deployed on-premises or in the cloud.
